Project File

Project Name: IndustryCare - Contingência 4.0

Incentive Scheme: AAC 15/SI/2020 - AC 15/SI/2020 - Research and Development and Investment in Test and Optimisation Infrastructures (upscaling) in the context of COVID-19.

Main Objective: Development of a platform that validates, monitors and assesses the level of risk of your company against COVID-19, with updated information in real time.

Period of Execution: 01-03-2020 to 31-08-2020

Total Eligible Cost: 98 728,06 €

Industry Safe Seal
From IndustryCare

Project Summary:

With the aim of preserving the national economy, it is intended to make available a Contingency Plan management tool that is robust from a technical point of view, updated according to the guidelines of official health entities, and extremely intuitive and user-friendly. This tool will be used by any industrial company, regardless of having already taken measures in that direction.

This Cloud hosted web tool will allow access from any place and any device. This fact guarantees dynamic management of the various aspects associated with a contingency plan, be it:

- In the development of preventive measures, associating resources and monitoring them in real time;
- In the recording of information relating to employees, enabling traceability;
- In an extreme situation of occurrence of a suspected case, triggering the Contingency Plan in a structured and monitored way.
