Project Summary:

With OLI Protect, it is intended to obtain conditions and skills to produce Industrial Protection Equipment, in order to make a strong industrial contribution in the national fight against the pandemic, through the production of completely innovative products for the company, differentiating itself, totally, from the core business that are used to.

Given the scarcity of certain products/protective equipment, the company aims to produce the following new products:

- Ear protection when using masks
- Door handles
- Hospital accessories
- Individual protection visors

Consortium:
